Fountains + Punch Bowls + Coffee Makers

These are electric beverage fountains for champagne, punch, or wine. Requires 110v outlet to run the pump and lights / 3 gallon capacity.

COOLING: These fountains do not chill any product used. We recommend adding your beverage cold as well as making chill blocks by freezing water in a zip lock type bag prior to fountain use. Place these blocks bag included in the lower supply level of the fountain. This will chill the product you are serving without diluting its concentration.
